The system provides:

- Easy, non-technical tender setup - designed for use by procurement teams
- Online forms based tenders resulting in complete and conforming submissions
- Template library for your own RFX templates - for faster tender creation
- Live completion percentage tracking - No more 'why didn't XYZ Co submit a tender?'
- In built respondent messaging retains complete record of all communications
- Locked 'Tender Box' functionality for public sector tenders
- Instant, automatic compilation of all responses - The biggest time saver of the tool
- Instant side by side, question by question view of all submissions
- Direct online scoring of responses - no distribution of tender copies required
- Automatic scoring of 'closed' questions - reduces evaluation time
- Highly secure with comprehensive audit record - to public sector probity standards
- Centralised archival record of all tenders

Trade Interchange provides:

- Unlimited training for procurement teams (delivered remotely)
- Unlimited 'how to' support for procurement teams
- Technical support for respondents and procurement teams
- Tender setup advice
- Pre-publication review of tenders as required

Security, Reliability

- Highly secure ISO 27001 Certified (Global IT Security standard)
- Mature, reliable platform and track record - SaaS since 2000
- Comprehensive back up and disaster recovery contingencies
- Access level based security (5 access levels plus team based restrictions)
- In use by large banks and central government agencies in Aus and NZ.
